# **DETAILED ACTION**

# Continued Examination Under 37 CFR 1.114

A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 07/17/2008 has been entered.

#### Information Disclosure Statement

The information disclosure statement filed 02/06/2008 fails to comply with 37 CFR 1.98(a)(2), which requires a legible copy of <u>each cited foreign patent document;</u> each non-patent literature publication or that portion which caused it to be listed; and all other information or that portion which caused it to be listed. It has been placed in the application file, but the information referred to therein has not been considered.

### **Drawings**

The drawings are objected to under 37 CFR 1.83(a). The drawings must show every feature of the invention specified in the claims. Therefore, "the peripheral device... ...that is directly operationally connected to no other device" must be shown or the feature(s) canceled from the claim(s). No new matter should be entered. Please note that Fig. 5 appears to show the device 90 connected to the bridge controller 3.

Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended

Art Unit: 2833

replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The figure or figure number of an amended drawing should not be labeled as "amended." Additional replacement sheets may be necessary to show the renumbering of the remaining figures. Each drawing sheet submitted after the filing date of an application must be labeled in the top margin as either "Replacement Sheet" or "New Sheet" pursuant to 37 CFR 1.121(d). If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

# Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

Claims 13, 8-10, 18 and 23 are rejected under 35 U.S.C. 103(a) as being unpatentable over Meng (US 6,231,399) in view of Zhu et al. (US 6,142,833).

Regarding claim 13, Meng discloses system board (col.2, line 57) comprising a connector (10) that includes: a first port (14) situated on the system board; a second port (16) facing inward to an interior of the system board; and a peripheral device (daughter board, not shown). Meng does not disclose the first port being situated at an exterior edge of the system board and facing outward from the exterior edge. However, Meng discloses that "changes may be made in detail, especially in the matters of shape,

size and arrangement of parts within the principles of the invention" (col. 3 lines 3-5). Accordingly, it would have been obvious to one of ordinary skill in the art at the time the invention was made to form the first port situated at an exterior edge of the system board and facing outward from the exterior edge, as a matter of inventors preference and/or to provide greater accessibility to the first port. Meng also discloses the ports being substantially functionally identical.

Page 4

Meng discloses the peripheral device (defined by the daughter board with any/all elements attached to it) including a single port for directly operationally connecting the peripheral device to another device; being directly operationally connected to the inward facing port by the single port; and being directly operationally connected to no other device.

Regarding claim 23, Meng, as modified, discloses substantially the claimed invention except for the ports being USB ports. Zhu teaches a system board comprising: a connector (Fig. 1) that includes: a first port (at 21) situated at an exterior edge of the system board and facing outward from said exterior edge, and a second port (at 23); the ports being USB ports, thus providing an efficient and reliable interface between the connector and the peripheral device, by reducing the number of electrical contacts and thus reducing the number of parts that can be damaged. Therefore, it would have been obvious to a person of ordinary skill in the art at the time the invention was made to form the ports of Meng as USB ports, as taught by Zhu, in order to provide an efficient and reliable interface between the connector and the peripheral device, by

Application/Control Number: 10/634,871 Page 5

Art Unit: 2833

reducing the number of electrical contacts and thus reducing the number of parts that can be damaged.

# Response to Arguments

Applicant's arguments with respect to claim 13 have been considered but are moot in view of the new ground(s) of rejection, as applied.

### Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Felix O. Figueroa whose telephone number is (571) 272-2003. The examiner can normally be reached on Mon.-Fri., 10:00am-6:00pm.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Renee Luebke can be reached on (571) 272-2009. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
